

XM radio is one of the best things that has happened to listening to the radio. It provides variety and quality that are not available elsewhere. We pay for these services and it should not be up the National Association of Broadcasters to determine what you are permitted to hear. To take away the freedom of people to choose what they want to listen to is another item of freedom the American People are losing. We enjoy the news stations, weather for various cities that you are traveling to and the information of road conditions. To let the congress make a change of this type is another show of their letting the lobbyist take charge of their not using the peoples choice.
